SIX CANDIDATES IN THE RACE FOR MAYOR; TWO ADDITIONAL ANNOUNCEMENTS ARE MADE.

**HENRY TITUS A CANDIDATE;
NOW IN THE RACE TO WIN.**

RECONSIDERS HIS DETERMINA-
TION NOT TO RUN AND AC-
CEDES TO DEMANDS OF HIS
MANY FRIENDS.

According to the requests made by
many friends among the citizens and
business people of Daytona, Henry
T. Titus announces that he has re-
considered his determination not to
be a candidate for the office of
mayor of Daytona and that he will
enter the race.

Several weeks ago Mr. Titus an-
nounced that he would not be a can-
didate at the coming election, giving
as his reasons for this announce-
ment, that his private business in-
terests would not permit the time
for the campaign or for the office
in case he should be elected.

Since that time three other citi-
zens have announced themselves as
candidates for the office of executive
of the city and Mr. Titus has been
besieged by his friends to again
enter the race. These requests have
been so numerous and so insistent
that Mr. Titus has decided to ac-
cede to the requests and will enter
the race with the determination to
win.

As a candidate for the office of
executive Mr. Titus says the only
plank in his platform will be to make
Daytona a clean, beautiful and at-
tractive city and keep it in this con-
dition. To accomplish this some re-
forms and changes will be necessary,
and, if elected, he will use his influ-
ence to bring about these changes.

Mr. Titus will begin his campaign
for election at once and declares he
will carry on a campaign that will
let every person in Daytona know
he is in the race and in the race to
win.

**NEW YORK BANK WRECKER AR-
RAIGNED IN COURT AND SENT
TO JAIL IN DEFAULT OF
PROPER BAIL.**

NEW YORK, Jan. 4—Guarded like
a common felon Joseph Robin, the
young bank juggler whose operations
wrecked two banks, was arraigned
before Justice Grain today, charged
with the theft of \$30,000 from the
Washington Savings bank.

Robin pleaded not guilty and his
bail was fixed at \$25,000, in default
of which he was taken back to the
Tombs and locked in a cell in "Mur-
derers Row."

**LIVELY FIGHT IN SIGHT;
ALL WORKING FOR VOTES.**

WITH SIX WELL KNOWN MEN
WORKING TO LAND THE OF-
FICE CITIZENS WILL WATCH
FOR DEVELOPMENTS.

With six candidates in the race
and every one determined to win, the
voters of Daytona will have plenty
of room for selection in choosing a
capable man for mayor in the com-
ing city election.

The five candidates, who have an-
nounced their candidacy, named in
the order in which their announce-
ments were made are as follows:

Simon Heymann.
M. H. Zuber.
Dr. G. A. Klock.
G. B. Seaman.
Henry T. Titus.

E. W. Greene, who has formally announced
his candidacy to the voters of the
city and each has announced a plat-
form of progressiveness for the
city of Daytona. Each is well known
to the citizens and voters and has
many friends, which gives promise of
one of the liveliest campaigns the
city has ever experienced.

Rumors have been going around
during the past few days that Mr.
Seaman had reconsidered his de-
termination to make a fight for the
office and would withdraw from the
race, but Mr. Seaman states the
rumor is unfounded and that he is
still in the race to win.

Mr. Greene has delayed the an-
nouncement of his candidacy until
the time for issuing the regular and
required proclamation for the elec-
tion next month, and is now sub-
mitting himself to the voters stand-
ing entirely on his record as a city
official.

The announcement of Mr. Titus
comes as something of a surprise to
many, and is made because of the
insistent demand of his friends that
he become a candidate.

Dr. Klock is making his race for
the office principally on the platform
of better sanitary conditions and gen-
eral improvement for the city of Day-
tona.

Simon Heymann, who was the first
man to announce his candidacy for
the office, has been making a quiet
campaign and urging the change in
the city charter which will provide
for a municipal judge to try alcazes
now brought before the mayor.

M. H. Zuber, although confident of
election, is working among his
friends and standing on his record
as a city marshal.

**MANY LIVES
SACRIFICED
IN RUSSIA.**

**HUNDREDS OF PEOPLE DIE
IN VIOLENT EARTHQUAKE.**

**BUILDINGS ARE DESTROYED AND
FISSURES TORN IN GROUND BY
QUAKE IN ASIATIC RUSSIA.**

TASHKENE, Asiatic Russia, Jan.
4—Hundreds of buildings have been
destroyed and many lives have been
lost in a violent earthquake which
occurred in Vyerny today.

Coming without warning the peo-
ple did not have time to escape from
the falling buildings and the lives of
hundreds were crushed out. Great
fissures were torn in the ground.

There are two tickets to the
Crystal Theater for tomorrow night
at the Daily News office for Miss
Gladys Peters.

**GREENE WILL RUN AGAIN;
STANDS ON HIS RECORD.**

IN SIGNED STATEMENT MAYOR
SAYS HE WILL RUN AGAIN AND
STAND ON RECORD HE HAS
MADE.

E. W. Greene is a candidate for
re-election to the office of mayor of
Daytona.

Mayor Greene's announcement to
this effect is contained in a letter to
the Daily News, in which he says he
has decided to become a candidate
for re-election by earnest request of
a number of his friends.

Mayor Greene announces no defi-
nite platform, but states that he will
endeavor to look after the city's in-
terests as conscientiously in the fu-
ture as he has in the past.

Mayor Greene's letter announcing
his candidacy, is as follows:

"Editor Daily News—In announcing
myself a candidate for re-election to
the office of mayor, I do so by the
earnest request of a number of my
friends and voters.

"My past record of four terms as
mayor and one term as member and
chairman of the board of public
works, the people have.

"I have only this to promise: That
if elected, I shall endeavor in the
future, as I have in the past, to con-
serve and safeguard the city's in-
terest to the best of my ability. I
do not think the mayor, the city
councilman or any citizen need blush
when Daytona is compared with any
other city in Florida.

"Respectfully,
"E. W. GREENE."

**STOCKS SHOW ADVANCE;
ENTIRE LIST GOES UP.**

NEW YORK, Jan. 4—Reading led
the advance in stocks today, reach-
ing 153. The entire list of stocks
advanced.

**MURDER AND SUICIDE;
TWO MEN ARE DEAD.**

PRairie, Miss., Jan. 4 — Oscar
Jones, one of the wealthiest planters
in Mississippi, shot and instantly
killed Henry Gleath this morning.
Then Jones committed suicide and
the two men fell side by side. When
the bodies were found they were
clasping each other by the right
hand.

WILL BE COLDER TONIGHT PREDICTION FOR FLORIDA.

**BIG DROP IN TEMPERATURE;
FROST IN SOUTH OF STATE.**

**WEATHER BUREAU SAYS TEM-
PERATURE WILL GO TO 20
DEGREES HERE TONIGHT AND
BE COLDER THURSDAY.**

WASHINGTON, Jan. 4—A further
decided fall in the temperature for
the Atlantic coast is predicted for
tonight with freezing in Florida to
the 26th parallel, which strikes the
East Coast at Hallandale, about 20
miles north of Miami, and frost in the
extreme southern portion of the
Florida mainland.

The temperature tonight will reach
about 20 degrees in the vicinity of
Daytona and the weather Thursday
will be continued cold.

Fruit and vegetable growers all
over the state of Florida are warned
to be prepared for the sudden drop
in temperature tonight and Thurs-
day.

NEW ORLEANS, Jan. 4—The coldest
weather experienced in 10 years
has the gulf section in its grip to-
day.

ATLANTA, Ga., Jan. 4—The ther-
mometer this morning registered
from 8 to 14 degrees above zero in
northern Georgia today. In places
there have been flurries of snow
and an icy wind has prevailed.

BIRMINGHAM, Ala., Jan. 4—Eight
degrees above zero was the register
of the thermometer here this morn-
ing, but the mercury has been rising
slightly during the day. Light snow
flurries have occurred.

A Check Book.

A check book does not burn a hole
in your pocket like actual money.
Signing your name to a check makes
you think. You don't spend a check
as readily and carelessly as you
spend the ready cash. An account
at our bank would tend to restrict
your spending. Try an account with
us and pay all your bills with
checks. We will gladly give you a
check book. If you will try this for
one year you will be surprised at
the money you will save and you
may then smile at all your troubles.

Make your bank account grow. It is
recording your history and telling a
truthful story of your success. Open
an account with us today. Drop a
little into the bank every week and
its rapid growth will surprise you.

CANAL MEN NO RIGHT TO COLLECT.

**MAY BE GETTING MONEY
WITHOUT ANY AUTHORITY.**

**RUMORS OF HOLD UP GAME
WORKED ON YACHT OWNERS
REFERRED TO GEO. F. MILES,
WHO REPLIES.**

Are the captains or men in charge
of some of the dredge boats work-
ing in the canals between St. An-
gustine and Daytona picking up a
little "pin money" by collecting fees
from the owners of yachts coming
south through the inland waterway,
and is a real "hold up game" being
worked on the owners of these boats?
This is a question which has
arisen as the result of rumors that
boat owners bringing their boats
south through the canals have been
compelled to "dig up" in order to
get the big dredges out of the way
so the yachts could pass. In fact it
is said this game has been worked
on each one of the several boats in
a string; the dredge swinging out of
the way of the first one after the
proper "fee" had been paid, and
then swinging back into the canal in
time to shut off the passage of the
next boat until another "fee" had
been received.

It is said that complaints have been
made by a number of boats which
have touched here on their way
south of the difficulty experienced in
getting through the canals, both be-
cause of the low stage of water and
the obstructions caused by the
dredges. It is claimed that the men
in charge of the dredges, say \$4 is
too much work to move for a pass-
ing yacht, but that they seem per-
fectly willing to move when the
"fee" is forthcoming.

Following up these rumors the
Daily News this morning solicited
information from Geo. F. Miles, gen-
eral manager of the canal company,
and received the following telegram:

"No dredge captain or other em-
ployee of the canal company have
right to collect money for allowing
passage of boats between Jackson-
ville and Daytona, but canals are
not yet completed and boats using
them must have permits from the
company and must expect delays as
moving heavy dredges during work-
ing hours is an expensive operation.
Kindly send particulars of any col-
lections made. Geo. F. Miles."

If there has been an extortion of
money from yacht owners by dredge
men in the canal the Daily News
would be pleased to have the com-
plaints made at this office and they
will be promptly forwarded to Gen-
eral Manager Miles with full partic-
ulars.

1 GRAND RAPIDS CAR Leaves
Jacksonville Mondays and Thursdays

T. B. WALKER, Fla. Pass. Agt.
118 West Bay Street
Jacksonville, Fla.

By L. C. DEMAREE.

One of Daytona's crowning glories is her incomparable beach. No one who has ever set foot upon its smooth, packed sands; no one who over pedaled a bicycle over its expanse; no one who ever drove a prancing pair of horses and listened to the popping of their steel shoes upon its asphaltum-like face; no one who ever steered a high-power automobile down the broad stretch of wave-washed and surf-packed sand but realized that it is a world better, a world-wonder. Go stand upon this wide speedway and see the happy souls fit by in joyous mood, and answer whether this is not one of the seven modern wonders.

The Placid, Pelucid Halifax River. Where think you is water with more picturesque surroundings? Nearly a mile wide, fringed with tropical vegetation, artistic cottages with roomy verandas looking out upon her bosom gamey food fishes in countless numbers beckoning, as it were, to those with rod and reel; her bosom flecked with duck and coot and snowy-winged sea birds, which sit about as if for the sport of bobbing upon the waves; watch that lubberly old white headed pelican pouch a fat mullet, and that fish hawk struggling upward with his floundering load he snatched from the water.

See the beautiful launches, spick and span, with hampers and lockers bulging with refreshments, both solid and liquid, ready for a cruise upon the beautiful surface. Take out your field glass and sweep the river from Ormond bridge to Ponce Park light house, then say whether the Halifax isn't a thing of beauty and a joy forever, and one of the modern wonders.

The Enchantingly Picturesque Ridgewood.

Ridgewood avenue is upon the crest of a broad ridge, straight as the crow flies and the wide spreading branches of the heavy-trunked live oaks extend their giant arms across the magnificent vista, forming an arch, and from these extended arms great festoons of Spanish moss sway as the trade winds from the tropic seas fan them. Looking straight ahead down this white shell street one has the impression of a fairy path with wicker draperies, but as you move along and cast an eye first to the right and then to the left you see distinguished cottage homes in the most delightful settings.

See the glistening leaf of the grand magnolia which nature has varnished as no artist's brush ever could; and the cabbage palms with their burdens of showy fruit and swaying palms; see the lovely holly with its exquisite berry; see the climbing vines run riot in the trees; see the cryptocarpous forms which gain a foothold on the great oaks and stately palms; and surely you will join in the chorus and say that this is a world wonder for beauty.

Surpassing Beauty of Our Cottage Homes.

No one of Daytona's attractions, perhaps, commands more nearly universal attention and praise than does the artistic cottages. The owners of these charming villas hail from every corner of the country and they bring their own architectural plans and build upon them, and, as the architecture of one section of the country differs from the architecture of another so do our homes differ in outward appearance and structural beauty from one another. There are no monotonous rows of strikingly similar buildings but the eye, as it sweeps by, is treated to a kaleidoscopic change which keeps the mind wondering, "What next?"

It is not only the exterior of many of these homes which rivets attention; within they are models of convenience, and the finishing and furnishing give evidence of the elegance and cultivation of those who worked it all out. Indeed, it is the interior arrangement and artistic furnishing and shading, more than the exterior appearance that gives a surpassing charm to Daytona homes. This feature justly merits prominence as another wonder.

Streets and Pavements the Most and Best.

Why the Architect of the Universe chose to give Daytona the most admirable, the most picturesque natural setting of all the cities of the South is not revealed, but that such is a

fact must be apparent to the most superficial observer. With such lavish wealth of natural beauty it became an easy thing for the hand of man to give the finishing touches which have wrought out the colors and outlines of the big picture.

Man did all this in the laying out of the streets with their wide margins of parkage. The entire city becomes a great park, with driveways intersecting, miles upon miles of driveways so good as to attract motorists from all over the continent.

And as for the pavements, pavements that look and act like granite—where else between the eastern and western seas are so many miles in proportion to inhabitants? The pavement question stands with the street as one of the chief drawing cards. Till some unheard of place reports more and better, Daytona throws down the gauntlet to the world.

Squirrels, Flowers, Birds and Fruit. Whatever one's shortcomings and however indifferent or even callous one may be to many things, the mere mention of "flowers and squirrels, birds and fruits" will send a thrill that is reflected in distended pupils and pricked ears.

For every visitor with a spare goober there is a bunny ready to come and accept your gift. He will sit bolt upright and know into the meat, casting furtive, saucy glances at you meanwhile. Flowers. Usually fresh and blooming the year 'round, you are reminded of Goldsmith's couplet where Smiling spring its earliest visit paid And summer's lingering blossoms are delayed.

In one yard roses of variegated hues predominate; another household has a penchant for the poinsettia and the premises are aflame; another is hidden in a jungle of tall cane. Variety is the spice of life and here is where you find it.

The birds flit in, and with their joyous notes help to give fullness and symmetry to the picture.

As for fruits, choice citrus fruits, Daytona yields the palm to none for quality and quantity per acre. There are scores of citrus groves in proximity to the city, branches bending to the earth with their burdens of luscious golden globes, which for beauty, proficacy and all desirable qualities would truly astonish you. The Fastest Autos and The Finest Out.

The seventh world wonder, do you ask? Come, whether from Missouri or from Maine, from Kalamazoo or Timbuctoo, and you will be "shown." Here is where the world's record for speed is broken with every recurring season. Autos, the biggest, the fastest, and the finest are on daily parade and the big show is as free as the pure artesian water from the thousands of flowing wells. It is a continuous show with a constantly shifting scene.

Everything goes, from a 2-horse power up to a 200-horse power, and all degrees of speed from a canter to a two-mile-a-minute clip. You will probably catch the spirit, when you do the roads and the beach are yours. The Florida sunshine is free, the balmy ocean breezes are free, the birds and squirrels and flowers are free, the sparkling fountain water is free and you will have to go down into your wallet only for coin for auto, and bed and board.

This is no fanciful picture; it's all here. It is drawing other thousands and holding them enthralled, it will charm and hold you. Come and see.

DELAND, THE ATHENS OF VOLUNIA COUNTY
DELAND, the county seat of Volusia County, is situated 23 miles southwest of Daytona and is reached from the latter city by an excellent hard-surfaced road recently constructed. At Deland is located the John A. Schusterman University, one of the leading educational institutions of the South. Because of the interest in southern educational Deland is known as "The Athens of Florida." Schusterman University has a faculty of 30 professors and instructors. There are over \$200,000 in buildings and equipment; nearly \$300,000 endowment; a Carnegie Library alone representing an investment in building, equipment and books, of more than \$200,000. The library is the United States Government depository for the State of Florida, and contains over 15,000 volumes. Science Hall, one of the newest of 16 buildings, with its furnishings, represents an outlay of \$20,000. Minshull Hall is one of the most beautiful college buildings in the South. The city has a population of about 3,500, with a thickly settled country adjacent. Deland proper is the middle end of the St. Johns River, on the high, rolling pine land of the great "Orange Ridge" of Florida. The "premier" products of oranges and grapefruit, the extensive crop from this vicinity being over 100,000 boxes this year. Caper, pomegranate, pears, Japan persimmons, plums, peaches, guavas, strawberries and other fruits are grown in plenty. In the way of public improvements are many miles of fine shell roads, an excellent high school, electric lights, a system of waterworks that is owned and operated by the city, supplying the parent water at little cost. Nine houses of worship testify that Deland is a church-going community. Baptists, Episcopalians, Methodists (Northern and Southern), Presbyterians, Christians and Catholics, besides colored Baptists and Methodists, are represented. The graded school offers a two years' course, and the building which it occupies is newly furnished throughout, and is one of the most commodious and best equipped public schools in the State. The trip from Daytona to Deland is made by automobile in a little over an hour, and there are many pretty drives in the vicinity of the county site. A good road leads to Deland Springs, five miles, a historic spot, where 60,000 gallons of water bubble from the earth every minute. From Deland automobiles go south to Osteen, 13 miles, on shell and marl roads; the St. Johns is crossed by ferry near Osteen and cars can then continue to Sanford and Orlando by hard road. There is a shell road from Deland to Orange City, five miles, and a good road from Deland to Lake Helen, a like distance.

Mr. and Mrs. Joseph Buckley arrived Tuesday afternoon from New York and are at their Ridgewood avenue residence, which has been rented for the season to J. C. Trees, of Pittsburg, Pa., and which they will prepare for the occupancy of Mr. Trees and family.

FILLED WITH CURIOSITY.

That Was Why He Was Anxiously Waiting Outside the House.

The man was standing behind a tree in front of an apartment house in a cross street when the cop on that beat came pounding along on the sidewalk. It was close to midnight, and naturally the cop stopped and looked at the man standing behind the tree.

"Howdy," says the cop, by way of opening conversation.

"You're another," replied the man good naturedly.

"Whut-buh doin'—waitin' for somebody?" inquired the brave policeman.

"Nope."

"Just standin' there, hey?"

"You're hit it."

"Live near here, do you?"

"Right in there," says the citizen, jerking his thumb in the direction of the apartment house he was standing in front of.

The cop looked at him thoughtfully for a minute.

"Mebby it's none of my business," he says, "and then again mebbis it is. I don't like to go round battin' into anybody's private affairs, but tell me, neighbor, what's your graft anyhow?"

"Well," loosened up the citizen, "if it's a case of me, standin' you or you creakin' from curiosity right in front of my eyes, I'll tell you how it is—provided it don't go any further. My wife says to me when I started downtown this evenin'—'If you're not home by midnight I'm goin' to pack up and go right back to mother's. So there!'"

"Well," says the cop.

"Well," repeated the citizen, "it's just about midnight now, and I'm like you—I've got curiosity. I'm waitin' here to see if she's goin' to keep her word."

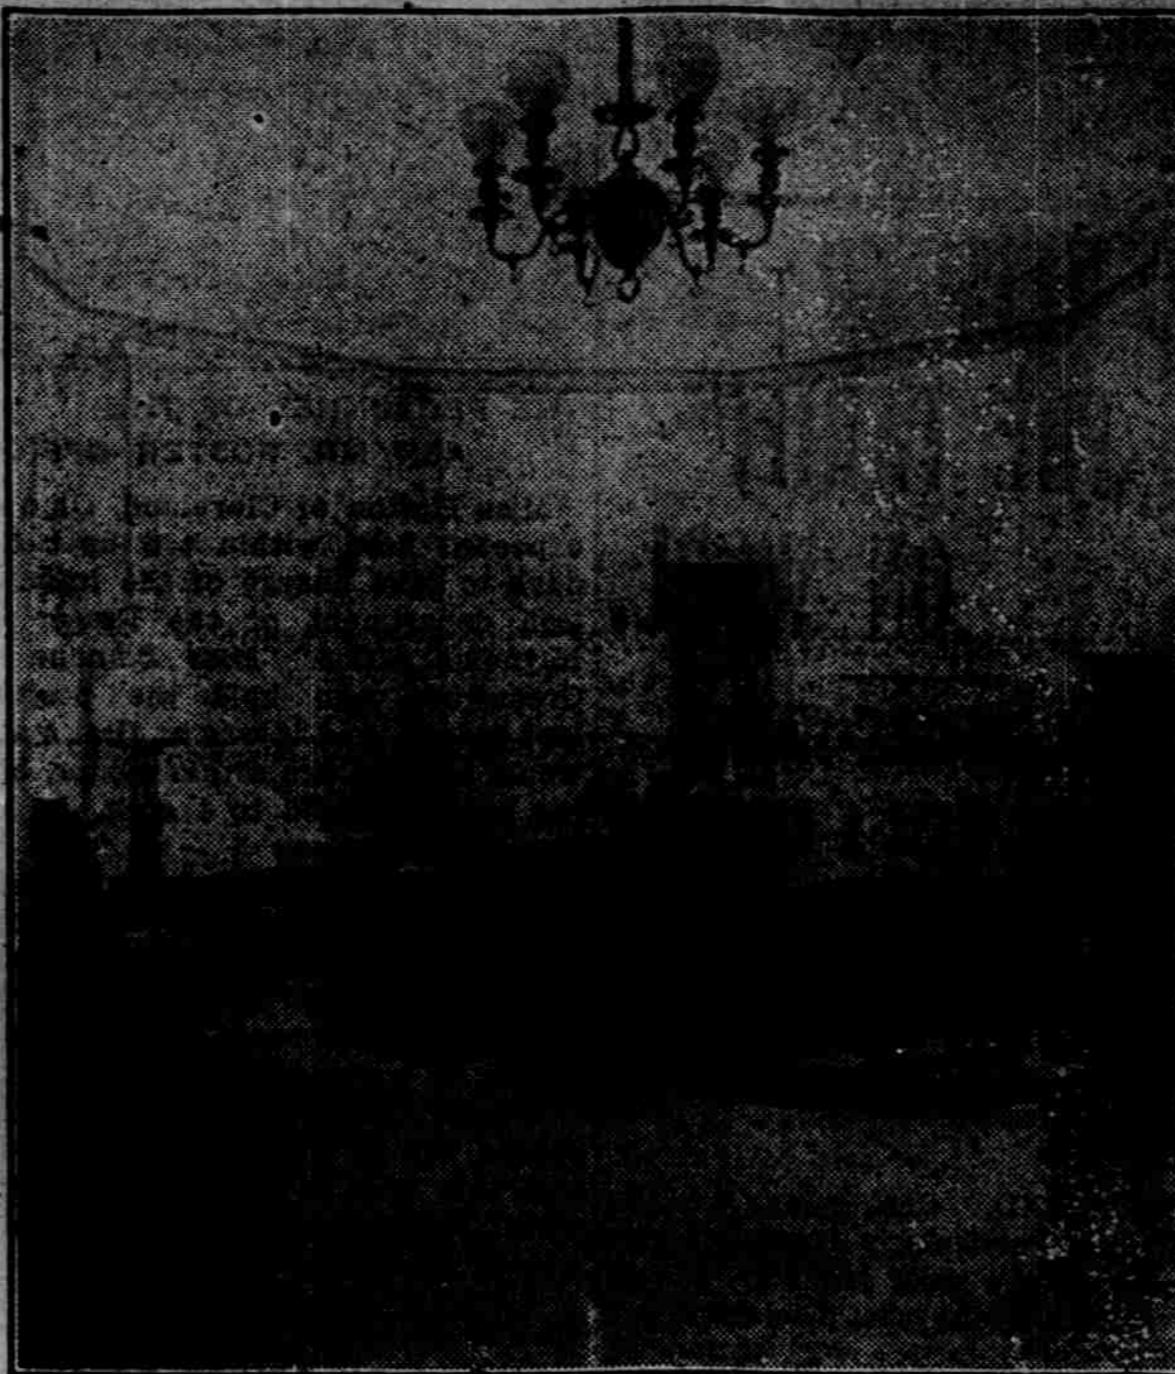

The cop's curiosity ceased at that point, and he walked on down the street whistling, without waiting to see the thing out.—Cleveland Plain Dealer.

THE SPEED MANIA.

Sensations That Come With a Ride in a Racing Motor.

Imagine yourself in a big racing machine plunging over a course at eighty miles an hour. For the average man the sensation is awful, but the speed kings revel in it. Down the road streaks the car. Lashed into a typhoon by the appalling speed, the still air roars in your ears. You think you will never regain your hearing. The resistance of the atmosphere is fearful. The slightest forward movement is an effort. Distant objects loom up suddenly before you and jump by. The landscape is a streaky line of green, blotched here and there as a house is passed. The gale seems to cut your face, and you feel yourself being gradually flattened out against the back of the seat. It seems that the glass in your auto goggles is on

Domestic Scenes Evident In Mrs. Mary Baker Eddy's Study Room

Copyright by American Press Association.

The study and writing room of Mrs. Mary Baker Eddy, the founder of the Christian Science church, has never been visited but by a few close friends and advisers. After her death permission was given by the church leaders to photograph the desk and the room where Mrs. Eddy had spent so many hours writing her books and teachings for her thousands of followers. The room was a combination office and living room. The furnishings are plain, but of rich material. Mrs. Eddy used a common office chair and a flat topped desk. A large Bible was constantly on her desk, and often when she grew weary of writing or dictating she would lean back in her chair and read a favorite chapter.

the point of breaking. Particles of dust are driven back in your eyes. You may become blinded. The vibration of the engine is terrific. Mysterious indicators fluctuate alarmingly. It may mean that the engine is on the point of exploding. What makes the floor tremble so? Surely something will happen now!

And then you hear explosions booming from the exhausts as the drivers "shut off." A sharp turn is ahead. The noise is deafening. The terrific speed does not seem to have been checked. The outline of the turn grows more distinct. It is sheer folly—maybe death—to rush at it at such a pace. You dare not breathe as the car tears into the bend. It skids and

a wall of dirt is thrown up alongside you as the driver, with a sharp twist of the wheel, sends the car once more back in the middle of the road. You are safe—until another turn is encountered.—Hampton's Magazine.

A fellow has to hustle now
And do his daily chores
And, furthermore, be careful how
He hangs around stage doors.

The stage door is a garish spot,
A risky place to lurk,
And loafing there has put a lot
Of fellows out of work.

The same is true from Maine to Cal.
And we have proofs to bring.
Just take a glance at Portugal—
It happened to a king.
—Louisville Courier-Journal.

PORT ORANGE is a pretty little village situated five miles south of Daytona on the Daytona-New Smyrna road, the main highway of the East Coast. The town is located on the Halifax River, and is connected with the mainland opposite by a bridge.

The town is well laid out and has many pretty homes. A large number of tourists and winter residents make Port Orange winter headquarters, one of the several attractions being the excellent fishing.

A short distance west of Port Orange are the remains of the old Dunlawton sugar mill, a place that is visited every year by hundreds of tourists. One time all the country west of Port Orange, surrounding the old mill, was a vast indigo and sugar cane plantation. The mill was operated extensively in those early days but has been in disuse for forty or fifty years.

A very interesting drive from Daytona is by ocean beach to the approach of the Port Orange bridge, across the bridge and then passing through the principal street of Port Orange to the ruins of the celebrated old sugar mill, returning to Daytona by the road on the mainland.

WOMEN IN PORTUGAL.

Dig in the Fields and Do Laboring Work in the Cities.

A good part of the farm work is performed by the women, who see no reason why they should regard digging, hoeing and plowing as the work of men alone. The man who owns a few acres of land will often leave its cultivation to his wife and daughters, while he labors as carpenter, stonemason or cooper, for caskmaking is one of their important industries. He also likes to get a job as a waiter in one of the numerous hotels at seaside resorts, for the country has thousands of continental and English visitors.

Women share in the heavy work of the cities as well. There are female porters, laborers on the docks, market tenders and even women coal heavers, fishermen, or, rather, fisherwomen, and sailors. They are as strong and hardy as their husbands and brothers and seem to stand long hours and hard labor as well.

Of course it rather takes away the glamour of romance when one sees a young woman with finely chiseled features and beautiful black eyes digging with spade and mattock or heaving a basket of coal into a ship's hold with as much ease as the American girl plays tennis and golf. Women seem happy under what we would consider hard conditions, so the reformer would probably have his labor for his pains if he suggested a change in this department of Portuguese national existence.—Christian Herald.

KILL THEM YOUNG.

Do Not Tolerate Weeds in the Garden of the Soul.

An old man was once walking with a little boy. They came across four shrubs. The old man said to the youthful companion: "Pull up the last one." He obeyed with ease. "Now the next." He obeyed, but it did not come so easily. "And the third." It took all his strength to move its roots. "Now the fourth." In vain the lad put forth all his strength. He only made the leaves tremble. He could not move the roots. They had gone strongly into the earth, and no effort could dislodge them. Then the wise old man said to the lad: "You see, my son, it is just what happens with our passions. When they are young and weak one may by a little carefulness over self and the help of a little aid from God easily tear them out."

but if we let them cast their roots deep into our souls there is no human power can uproot them. The almighty hand of the Creator alone can pluck them out. For this reason, my child, watch well over the first movement of your soul and study by acts of virtue to keep your passions well in check.—St. Louis Globe-Democrat.

Something in the Eye.

Small substances, like cinders, dust or small chips of stone or metal, can often be removed from the eye by very simple means. Sometimes catching the upper lid by the lashes and pulling it away from the eyeball and down over the lower lid, then letting it go, so that as it recedes its under surface is swept by the edge of the lower lid, will clear it out. If this does not prove successful a loop made of a horsehair or of a long human hair can be passed under the lid and swept from the outer side toward the nose and drawn down. Better than this, however, is the washing of the eye or flushing with the eye dropper. Every person should carry one in his traveling bag, for they are invaluable. Catch hold of the lower and upper lid, draw them away from the eye and then fill the dropper, which is like a small syringe, with water and flush the eye two or three times. This will always remove the cinder at once.—Family Doctor.

Not a Born Forger.

The indorsement of checks is a very simple thing; but, as the following story will show, it, too, has its difficulties:

A woman went into a bank where she had several times presented checks drawn to Mrs. Lucy B. Smith. This time the check was made to the order of Mrs. M. J. Smith. M. J. were her husband's initials. She explained this to the paying teller and asked what she should do.

"Oh, that is all right," he said. "Just indorse it as it is written there."

She took the check and after much hesitation said, "I don't think I can make an M like that."

Prepared For Emergency.

"What makes you keep giving me fish for dinner day after day?" he inquired. "Are you particularly fond of it?"

"No," she replied. "I was wholly unselfish. I read a lovely recipe about how to remove a fishbone when it sticks in your throat, and I wanted to try it."—Washington Star.

Entered as second class matter December 1, 1910, at the postoffice at Daytona, Florida, under Act of March 3, 1879.

TO KEEP UP THE TARIFF ON WOOL.

NATIONAL GROWERS' SOCIETY DOESN'T WANT A REDUCTION.

WOOL MEN FEE THAT THEIR SIDE OF THE QUESTION HAS NEVER BEEN PROPERLY PRESENTED.

PORTLAND, Ore., Jan. 4.—The tariff and particularly that part pertaining to the wool industry, schedule "K," will be the prime subject of discussion at the convention of the National Wool Growers' association, which began today and will continue three days. In this instance the agitation is not for a tariff cut, but for the maintenance of the present high rates on wool, the sheep growers claiming that any downward revision of the tariff will cause the ruin of a profitable industry in the United States and a personal loss of millions of dollars to the members of the association.

It is felt by the wool men that their side of the case has never been presented to the public fairly and they charge that the agitation that has arisen against them is due to the efforts of political muckrakers and mudslingers. They point to a letter from Secretary of Agriculture Wilson to George S. Walker of the Wool Growers' association as indicative of the importance with which the wool industry of the United States is viewed in official circles. Secretary Wilson says in part: "I do not think it would be wise to have legislation by congress detrimental to the wool interests of the country. The development of the sheep industry should be encouraged not retarded."

Secretary Walker states that every effort will be made to perfect a means of bringing the wool situation before the nation in its true light. He says:

"The newspapers of the country have been filled with misrepresentations of the wool schedule ever since the enactment of the Payne-Aldrich law and to date the wool growers have been patient sufferers, making little or no effort to correct the erroneous ideas entertained by the masses. The tariff in operation at the present time is the same law that has been in effect since 1897. The fact is that this tariff enters into the cost of clothing to such a small extent as to be of little consequence. While the present tariff of 11 and 12 cents a pound on wool of the first and second quality is absolutely necessary to save the sheep and wool industry from annihilation. The producers of wool and mutton are not obtaining the profits generally accredited to them. The prices of wool today to the consumer are lower than for five or six years."

In addition to the all-absorbing topic of discussion the convention will offer to the delegates a program of entertainment and education which will make it a memorable event in sheep and wool growing circles. Addresses upon everything pertaining to the sheep industry will be delivered by men prominent in the live stock world. A sheep show, the most extensive ever held, will attract prize entrants from all over the United States, and for the first time conventions there will be held simultaneously with the sheep exhibition.

STRANGER LOSES ROLL IN JACKSONVILLE GAME.

JACKSONVILLE, Jan. 4.—A few hours after he had stopped off in this city on his way to West Palm Beach, Charles Hasners, of Youngstown, Ohio, reported to the police that two smooth strangers had met him at Hemming park and, through the medium of a coin flipping game, had managed to separate him from \$50 of his roll.

Miss Alberta Lourcey was called to New Smyrna Tuesday night by death of her father's mother, Mrs. I. J. Matthews, who died in that city sometime during the afternoon. Mrs. Matthews was of advanced age and had been in failing health for some time.

PALM BEACH COUNTY HAS GOOD ROADS.

PEOPLE DOING THEIR SHARE FOR EAST COAST HIGHWAY.

PEOPLE IN THE SOUTH PART OF STATE READY TO BOOST THE MOVEMENT FOR GOOD, HARD-SURFACE ROAD.

PALM BEACH, Fla., Jan. 3.—Palm Beach county, the youngest in the state, is this season building her part of the great road system down the East Coast. While other and older counties are talking, wishing and scraping over this matter, the roads are being built here and in a substantial manner.

No part of Florida has so many winter visitors who bring with them their automobiles as has Palm Beach and this county has now more than forty of the sixty miles of road across the county built and in use. This makes, with the excellent roads in Dade county, to the south, a stretch of over 150 miles of the finest scenic route in the world. Nor is this all, Palm Beach county is now building roads both north and south of the Royal Poinciana on the east side of Lake Worth, and the only road to the now far-famed Everglades is built west of Palm Beach, running seven miles past the new truck and vegetable farms of the Glades.

It is now up to the older counties lying along the East Coast to take example from the "baby" county of the state. What Palm Beach county needs now is a system of roads running west to tap the almost inexhaustible resources of the interior now being rapidly brought up by actual settlers. Several of these roads are now being built, and these will be extended further west every year until they finally reach Lake Okechobee.

When Florida can announce to the Automobile Association of America that there is a hard surface road from Jacksonville to Miami with good bridges, the busiest men in Florida will be the speed limit officers.

Palm Beach, the banner county of the East Coast of Florida, challenges any county in the state to contest with us in pushing his great project to a speedy completion. This is not a matter of sentiment, but a business proposition that will pay good returns.

WE MAY STILL HOPE FOR NEW POSTOFFICE

The heaviest week's business ever transacted is reported from the Daytona postoffice, and while it is said that arrangements were made to expediate the work and recent improvements were advantageous, the increase of 20 per cent over all previous records showed very plainly that Daytona should have a new and much larger postoffice, says the Jacksonville Times-Union. That this beautiful and progressive city will get all that it needs from the federal government cannot be doubted, but probably it may be some time before the new federal building can be secured.

ROBBERY IN JACKSONVILLE; TICKET OFFICE ENTERED.

JACKSONVILLE, Jan. 4.—The city ticket office of the Seaboard Air Line railway was entered by thieves sometime during the night Monday and an effort was made to blow open the big steel safe, which contained about \$1,500 in cash. The effort was unsuccessful, however, and the only things carried away were some Pullman tickets and personal belongings of H. D. Terrell, the local ticket agent.

A PROGRESSIVE SECTION OF DAYTONA BEACH.

A. Vande Vord, of Daytona Beach, while in the Daily News office Wednesday morning, stated that arrangements had been made for electric lights upon Daytona street, Daytona Beach, the current to be turned on the latter part of the week.

Palmetto, a short street running south from Seabreeze avenue, is blessed with a progressive lot of residents, who work in harmony for the improvement of their section of the town and their street has been kept in the forefront of advancement, setting an example for the balance of the town.

The regular monthly meeting of the Hotel Men's Association of Daytona will be held at the Ridgewood hotel this evening, beginning at 8 o'clock. The meeting was postponed from Monday evening because of the Hotel Clarendon opening.

NEW COUNTY BOARD MEETS AT DE-LAND.

FISHER AGAIN CHAIRMAN; COMMITTEES ARE NAMED.

ONLY CHANGE IN PERSONEL ON COMMISSIONERS IS THAT LE-ROY HARDEN SUCCEEDS R. D. BROOKE.

The new board of county commissioners now has charge of the affairs of Volusia county, the old board having formally turned over the county affairs to the new board at the regular meeting in DeLand Tuesday, after which the old board adjourned, sine die.

The only change in the membership of the new county board is from one district, LeRoy Harden, of Orange City taking the place of R. D. Brooke, of Osteen. The new board immediately organized by re-electing G. W. Fisher, chairman, who announced the appointment of the following permanent committees: Finance—W. P. Wilkinson, chairman; W. D. Bradshaw, J. G. Cade.

Poor house and building—LeRoy Harden, J. G. Cade, G. W. Fisher.

Previous to adjournment the old board listened to the road and bridge reports from the district commissioners. District No. 2 reported that the stockade on the DeLand, Daytona road has been completed and that the convicts are now at work. The report also told of repairs to the Crow's Bluff and Orange City roads.

District No. 5 reported repairs on the New Smyrna-Oak Hill shell road, and repairs to the amount of \$30 on the Rose Bay fill, with the convicts at work on the New Smyrna, Osteen road. By vote of the board A. W. Kimball was appointed a guard to the prisoners for district No. 5.

The toll rates for the East Coast ferry as adopted by the Orange county board were approved as follows:

"This ferry is free from sun up to sun down, except Sunday. The ferryman is allowed to charge from sun down to sun up and Sundays, viz:

Automobile 50 cents

Double team 50 cents

Single team 25 cents

Man on foot 25 cents

The treasurer's report for December, 1910, was duly examined and approved and the county clerk was instructed to advertise for bids for heating the court house with hot water, as per specifications on file in the clerk's office.

DAYTONA AS AN EXAMPLE FOR ST AUGUSTINE CITY.

The St. Augustine Evening Record advises the city council of that city to be progressive in the matter of good streets and roads and cites the recent action of the Daytona city council in ordering a quantity of Glurin to be placed on the streets here, as an example of progressive ness. The St. Augustine city council is advised to watch the result of the experiment in Daytona and follow in the footsteps of this progressive city if the experiment proves the success expected. There are many other ways in which St. Augustine could follow the lead of Daytona with profit.

been a real business. He inherited the trust and, referring to the recent death of a sister, said, "I was, thirty years ago, I inherited a small lot of real property, and the Federal estate tax was \$100,000. Five years later I inherited another, when it was just over \$100,000. Five years ago I inherited a third, at a cost of \$100,000, and the tax for that estate was nearly \$150,000."

Young Mrs. Catherine Barker must be added to the party of visitors to the island, who are to sail for the island tomorrow. She is the wife of a well-known businessman, who has been in the island for some time, and is well known to the islanders. She is the wife of a well-known businessman, who has been in the island for some time, and is well known to the islanders. She is the wife of a well-known businessman, who has been in the island for some time, and is well known to the islanders.

The Little League.
It is hardly fair to compare this, the first year of the new American League, with the expanded Negro leagues. The latter have a long working past, but when it comes to the new American League, it is like watching a professional basketball player in the gymnasium for the first time, and then seeing him play on the street. He has never lost sight of what he is doing.

DOI: 10.1002/for

Before we pass judgment upon another let us stop and think if we have ever been placed in circumstances as difficult as his. Not all ways can we have the resources we have, but when there is enough against upon the surface, if we would but look for it, to make us think the best, we shall find it.

Mrs. W. H. Freeman
Proprietor

SEABREEZE and DAYTONA BEACH, two enterprising and progressive towns on the Halifax Peninsula, are geographically one although incorporated as separate municipalities. The towns parallel the peninsula north and south for a distance of from three and one-half to four miles, and extend east and west from the surging waves of the Atlantic Ocean to the Halifax River, the beautiful tide water stream that sets them apart from Daytona with which they have close communion by means of three bridges, as well as a half-hour ferry service.

Seabreeze and Daytona Beach are essentially summer and winter resorts and are making hundreds of new friends every year among those who desire to escape the discomforting extremes of heat and cold, and their hotels and boarding houses are now receiving splendid patronage from the most discriminating class of tourists.

The ocean itself, with its marvelous beach, hard as macadam and smooth as a floor, is the greatest attraction, although earth, air and sky seem to have entered into a combination to enhance its every charm. The beach is the famous automobile race course where every world's straight-away record has been made, and all these records it continues to hold without rivalry.

The beach has a width of 300 to 500 feet and can be used from two hours after until two hours before high tide, thus giving an average of seven or eight hours for automobilizing some part of each day. Seabreeze and Daytona Beach each have a permanent population of approximately 1500. Sanitary ordinances are strictly enforced, streets and sidewalks are well kept, and new streets are being opened as fast as the increasing population demands. Besides hotels and boarding houses there is ample cottage accommodation for all winter visitors in both towns.

Daytona, Fla.

When Mrs. Frederika Bremer, a young woman from Sweden, Va., visiting another sister, reached the beautiful university town of Chapel Hill, N.C., she was met by the famous Dickens and Mrs. Martineau passed us by," says Mrs. Peyer in her book entitled "My Day—Reminiscences of a Long Life." But Frederika Bremer condescended to spend a night with her compatriot, Baron Schele de Vere of the university faculty, on her way to the south.

Schele de Vere invited a choice company to spend the one evening Miss Bremer granted him. Her works were extremely popular with the university circle, and every one was on tiptoe of pleased anticipation.

While the waiting company eagerly expected her the door opened—not for Miss Bremer, but for her companion, who announced:

"Miss Bremer, she beg excuse. She ver' tired and must sleep. If she come she gape in your noses."

Funerals in England.
At the time of Queen Victoria's funeral a writer in the *Undertakers' Journal* complained that, while royal burials were still conducted in an impressive manner, a sad lack of ceremonial distinguished the funerals of the nobility. "Item after item has been abandoned, idea after idea has been dropped, each meaning a distinct loss to our business. An undertaker in the west end, referring to the recent death of a noble lord, confided to me: 'Forty years ago I buried a member of that family, and the funeral bill came to £1,250 (\$6,250). Ten years later I buried another, when it came to just over £700 (\$3,500). Fifteen years ago I buried a third, at a cost of £320 (\$1,600), but the bill for this one did not reach £75 (\$375).'"

A Spoiled Evening.
"Did she have a good time at the dance?"
"Not very. You see, nobody raised any fuss because her partner took more than five dances with her."—Detroit Free Press.

A friend that you have to buy won't be worth what you pay for him, no matter what that may be.—Prentice.

BE CHARITABLE.
Before we pass judgment upon another let us stop and think if we have ever been placed in circumstances as difficult as his. Not always can we know his circumstances, but often there is enough apparent upon the surface, if we would but look for it, to make us check the harsh words that rise to the tongue.

Miss Catherine Barker Must Struggle Along on \$60,000 a Year

Young Miss Catherine Barker must be added to the galaxy of American heiresses, if, indeed, she is not the brightest gem in that array of beauty and wealth. Her father, John H. Barker, who died recently, bequeathed \$14,000,000, his entire fortune, to Miss Catherine, fourteen years old. She is the richest girl or unmarried woman in the country. By the time Miss Barker comes of age, even of marriageable age, her wealth will have increased vastly. Her father's will made the First Trust and Savings bank her guardian and manager of her estate, and that institution is noted for its conservative administration. However, those who know Miss Barker best say money cannot "spoil her." A friend of hers called her a "home girl" and added, "She will remain Catherine; never will she become Katherine." John H. Barker was a son of John Barker, who started the Haskell-Barker Car company at Michigan City, Ind. Dying, John Barker left the business to his sons, John H. and Wallace Barker. When his brother died John H. Barker became sole owner of the concern, which builds everything on wheels, from a palace car to a narrow gauge dump car.

The Great Star Arcturus.
The star Arcturus, which is known to be a sun for a faraway system of planets, is 11,500,000 times farther removed from us than is our solar luminary. His diameter is 71,000,000 and his circumference about 224,000,000 miles. Our sun is but 866,000 miles in diameter, a fact which proves that Arcturus is at least 551,000 times greater in bulk than is our "great orb of day."

The Lion's Share.
It is really not the male lion, with his terrific roar and formidable appearance, that the explorer fears, but his mate. The male lion is a good looking posser, but when it comes to business it is his wife who counts, a la the African native. Game is pulled down by the female lion, and then the male beats her off until he has feasted to repletion, when she may have what is left; hence "the lion's share."

Seabreeze and Daytona Beach are essentially summer and winter resorts and are making hundreds of new friends every year among those who desire to escape the discomforting extremes of heat and cold, and their hotels and boarding houses are now receiving splendid patronage from the most discriminating class of tourists.

Seabreeze and Daytona Beach each have a permanent population of approximately 1500. Sanitary ordinances are strictly enforced, streets and sidewalks are well kept, and new streets are being opened as fast as the increasing population demands.

When Will Corporations Receive the Proper Regulation?

By Senator THEODORE E. BURTON of Ohio.

THE proper regulation of corporations in the United States has been rendered more difficult because of the disposition to give them a **FREE HAND IN THE DEVELOPMENT OF THE COUNTRY.** Another very serious obstacle has been the confusion and competition created by the authorization of corporations in forty-six states and two territories.

REFORM WILL COME WHEN NOT MERELY LAWS AND REGULATIONS ARE PERFECTED AND THE OFFENDERS ARE PROPERLY PUNISHED, BUT WHEN ALSO THE GENERAL PUBLIC ADOPTS STANDARDS OF CONDUCT UNDER WHICH THE POSSESSION OF LIMITED MEANS IS TO BE PREFERRED TO WEALTH, UNLESS WEALTH CAN BE OBTAINED BY HONEST METHODS.

The first object should be to **PREVENT FRAUD UPON STOCKHOLDERS AND CREDITORS** by concealing the real condition of the corporate business. Generally speaking, the requirement for greater publicity is the line of salutary reform.

With the prevalence of the idea that corporations aid the country's development success in acquisition is worshiped, and even those professing the highest moral aims speak with nonchalance and even with commendation of the tricks in the management of corporations and **LAUGH AT EVASIONS OF STATUTORY AND MORAL LAWS** as if the guilty ones displayed the most perfect types of mental acumen.

We have many reformers seeking to revolutionize the conduct of others when **THEY THEMSELVES WOULD BE GUILTY OF THE SAME PRACTICES** if they had opportunity. Just as charity begins at home, so does reform in business and corporate methods.

This Is a Period of Great Extravagance Everywhere.

By JOHN E. PARSONS, Lawyer, of New York.

IN France there is a condition of things not unlike that with which we are threatened at home. I saw a statement to the effect that there were a **MILLION PERSONS IN GOVERNMENT EMPLOYMENT.** This means upon railroads and in the government offices connected with all the public works.

THIS IS A PERIOD OF VERY GREAT EXTRAVAGANCE EVERYWHERE. THE UNITED STATES MAY BE CALLED AN ENORMOUSLY RICH COUNTRY, BUT THERE IS A LIMIT TO ITS EXPENDITURE, AND, IT MUST BE REMEMBERED, THERE ARE TO BE MAINTAINED STATE GOVERNMENTS AS WELL AS THE FEDERAL GOVERNMENT.

It has seemed that the number in the public employ could be **GREATLY CURTAILED,** and it looks as if this is being recognized by the powers that be, and he in public office will deserve untold credit who will see to it that **FOR A DOLLAR OF THE PUBLIC MONEY A DOLLAR OR NEARLY A DOLLAR OF HONEST WORK IS RETURNED.**

The situation which is facing America, France and England are also compelled to meet at this time. The idea seems to prevail that change necessarily means advance or improvement. The **REMEDY IS IN THE SOUND COMMON SENSE OF THE PEOPLE** when it is permitted to assert itself.

I do not quite believe that "vox populi" is "vox dei." Sometimes it is apt to be the voice of the other gentleman. But, after all, our hope must be in the sober second thought of those intelligent and capable persons who are best able to give suitable direction to public affairs.

Women Control the Ballot Without Having to Vote.

By Countess DE BRIE of France, Who Paid This Country a Visit.

WOMEN are demanding so called rights, clamoring for suffrage. They forget that, as it is, **THEY HAVE MORE RIGHTS THAN THEY KNOW HOW TO MAKE USE OF.**

Their mission, the greatest of all missions, is to bear and to mold the next generation. To this they should devote their best efforts. They should endeavor to be good wives and mothers, **LEARN TO GOVERN THE HOME AND NOT TRY TO RULE THE STATE.**

A mother needs **ALL THE QUALITIES OF A GREAT STATESMAN** combined with the tenderest womanly attributes.

She requires self control, intuition, concentration, decision—in fact, the very highest physical, mental and spiritual qualities—for mothers are responsible for the health, progress and welfare of the race.

IT IS THEIR INFLUENCE DURING THE TENDER YEARS OF CHILDHOOD THAT ACTUALLY CONTROLS THE BALLOT BOX. THEY INSTILL THE THOUGHTS AND INSPIRE THE ACTIONS THAT LATER NOT ONLY HELP TO FASHION THE CAREERS OF THEIR OWN CHILDREN, BUT OF THE WORLD AT LARGE.

The editor of a newspaper who seldom contributes any written matter himself does more for it by directing the staff than the best writer on it.

So with women. They **DO MORE TOWARD SWAYING A POLITICAL CAMPAIGN IN THIS OR THAT DIRECTION** within the four walls of the home than any **INDIVIDUAL VOTE** provided he is not a hired one.

A DEADLY REPTILE.

The Fer-de-lance the Most Venomous of All Serpents.

ITS STING A DEATH WARRANT

Little Chance For a Victim of the Fange of This Terror of the Island of Martinique—The Cat and the Mongoose Its Most Formidable Enemies.

Every one is perfectly well aware that there exists a large number of venomous serpents—we have many of them right here in the United States; the rattler, for example—but probably no other spot in the known world has such a death-dealing reptile as has the French island of Martinique, nestling in the limpid blue waters of the Caribbean sea. It is the fer-de-lance, scientifically known as *Trigonocephalus lanceatus*, that can beyond the shadow of a doubt lay claim to being the most deadly serpent of the earth. Its sting means almost certain death.

There are eight distinct varieties, the most common being a dark gray and black speckled, which coloring enables it to conceal itself easily among roots and stumps of trees. Another variety is a clear, bright yellow, and when bidden in the freshly cut cane it can hardly be distinguished from the stalks. It may also be a dark yellow or coal black with a yellow belly.

It is not a large snake, rarely exceeding five feet in length and in circumference approximately the size of a child's arm. To repeat, the sting means almost certain death, and should not the service of a physician, or "panseur," as the natives call him, be obtained within a very short time the venom does its deadly work—the flesh grows cold, softens, becomes pulpy, changes in color, quickly begins to rot, and a great chilliness creeps through the blood. This lasts only a few minutes—possibly half an hour—then death.

If the victim is fortunate enough to get a physician upon the scene post-haste and no artery or vein has been pierced there is hope—just a faint hope—but even if life is saved the danger is not entirely removed, for in many cases necrosis of the tissues follows. The flesh corrupts and falls from the bones, and the body molders as does a tree.

There is, however, a heroic method of treatment often brought into use by the Martiniquans. It is the immediate amputation of the leg or arm if the sting happens to be in either. Even this has to be done at once and before the venom circulates through the system. There are to be seen today upon the island many natives with limbs missing, and in the majority of cases it is the result of having the machete, or cane knife, applied after an experience with a fer-de-lance.

The fer-de-lance is a fighter—and no mistake about it—aggressive and pugnacious, and domestic animals, with the cat as the one exception, stand a very poor show in a battle. Pussy, in about nine cases out of ten, will come out of the scrap with colors flying because of the fact that it is apparently quite as quick in movement and at the same time uses what may be termed ring generalship.

There is but one animal other than the cat that successfully wages war upon the fer-de-lance. It is the mongoose (ichneumon), imported from India a number of years ago for the sole purpose of getting rid of the snakes.

Of the weasel family and looking very much like it, this little animal is absolutely fearless so far as snakes are concerned and will just as readily tackle one five feet in length as one a foot long. From the mongoose the fer-de-lance will flee, but if cornered will put up a great fight, using every trick at its command—a useless sort of contest, however, for within a short time it will be stretched out lifeless.

A battle between these two natural enemies is well worth witnessing. It is never a "limited" fight, but to a finish always, and probably the snakes by this time have come to understand that when they enter such a combat it is with the odds greatly against them.

The mongoose is quite as clever a ring general as the cat and uses that gift to advantage. Strategy more than strength is its asset.

When they meet, and if the snake sees no avenue of escape, it prepares for battle, as does the mongoose, but in a more leisurely manner. It takes about one minute for them to get fully prepared. There is no shaking hands, so to speak, as by prizefighters.

The mongoose circles about the reptile, always at a safe distance and "drawing fire," inviting it by moving closer and closer to dart out its head and then quickly jumping out of harm's way. It torments in every possible manner, causing the snake to change position time and time again, tiring it by forcing a strike again and again without ever reaching the objective point. At last, seeing its opponent at some particular disadvantage, the mongoose springs forward quick as a bolt of lightning, catches it firmly with the teeth behind the triangular head—a shake, possibly two, no more—and in less time than it takes to tell it the fer-de-lance is dead, its vertebrae severed.—New York Times.

The gods have attached almost as many misadventures to liberty as to servitude.—Montaigne.

Frige Veld From Greenland's by Mountains.

THE MAKING OF AN ICEBERG.

Huge Sheets of Ice a Mile Thick in Places Slide Down to the Sea, and as the Ends Become Too Heavy They Break Off and Form Berge.

At any time of the year ice may be encountered in the Atlantic north of the fortieth parallel of latitude, approximately that of New York, and between 42 and 55 degrees west longitude, but it is in spring, when the increasing warmth of the sun loosens the arctic ices and causes the bergs to melt and float from the places where they have been stranded, that there is the greatest danger to the mariner.

The bergs have their origin almost exclusively in western Greenland, although a few may come around Cape Farewell from the Spitzbergen sea and some from Hudson bay.

A huge sheet of ice a mile thick in places covers the whole of Greenland. This gradually slides down the valley toward the sea, into which it is thrust in great sheets fifty miles wide. As these ends become too heavy they break off and become bergs. The process is known as "calving." The pieces set adrift thus may be a thousand feet out of the water and a mile square, but as they drift about they become broken and continue to diminish in size until they finally disappear completely. The process sometimes takes several years.

Once set adrift icebergs find their way into the Labrador current and begin their journey. But of all bergs so set adrift only a very small proportion ever find their way into the path of the transatlantic steamships.

Nor do all bergs take the same course. Some go south; others lodge against the shore or against islands. Two years may separate the time that two bergs reach a low latitude, though they were "calved" at the same moment.

Field ice also offers an obstruction to the icebergs, though by their great size and bulk they often act as plows and aid materially in breaking up the ice fields which obstruct the arctic basin.

Ice fields are more affected by the wind than are icebergs. Bergs generally drift with the current, so that one sometimes is seen moving into the wind.

Advantage is taken of this by the sealing and fishing boats when caught in an ice field. They often moor to an iceberg and are towed miles through the ice, through which otherwise they could make no headway. This is accomplished by sinking an anchor into the berg and using a strong towline. As the berg advances open water, with small floating ice, is left astern.

But this is indeed a dangerous thing to do. All ice is brittle, but especially icebergs. A blow of an ax has been known to split one, while the report of a gun at times will accomplish the same end. In July and August, when the bergs are breaking up along the coast of Labrador, the noise at times is deafening, and the noise of one often causes another to break up.

From their very nature icebergs assume an endless variety of shapes. Some resemble geometrical figures, while others carry fantastic domes, spires and minarets. Sometimes they appear to be veritable ice bridges, with two separate supports. In many there are great caves and indentations. As they drift south and begin melting cascades of water pour down their sides or run from the tips of the hundreds of icicles which depend from every ledge.

Frequently there are outlying spurs in the water, as dangerous to ships as submerged reefs. For this reason vessels should always give them a wide berth, half a mile being considered the nearest that one may be approached with safety.

Several years ago the British steamship Nessmore ran into an iceberg and stove in her bows. When she was docked a scratch was found next the keel the full length of the ship, the plates being almost cut through. The ship evidently struck a submerged spur. The government report says:

"It is generally best for ships to go to windward of them, because disintegrated fragments have a tendency to drift to leeward, while open water will be found to windward."

So nicely are icebergs balanced in the water that the slightest melting sometimes will cause the center of gravity to shift, and the entire berg will capsize or founder. Thus many ships have been wrecked.

Field ice is formed throughout the waters within the arctic circle south as far as Newfoundland, and each year vast flocks leave the shores and drift south into the paths of commerce. The arctic ice often has lived through several seasons in the far north and occasionally is ten to fifteen and sometimes twenty feet thick. Because of its continual motion, due to currents, wind, etc., gradually it becomes broken up. Swells from storms in the open seas cause it to raft or pile one pan on another—in the arctic every piece of field ice is a pan—until it is covered with hummocks.

Ice also becomes rafted by the grinding of a free field against another frozen to the shore or by the grinding of two fields against each other when one is given a turning motion by contrary wind and tide. This rotary motion, it is said, is particularly dangerous to ships that get caught between bergs.—Chicago Lake Ocean.

LEADER OF ANARCHISTS FOUND DEAD.

IN RUINS OF BURNED HOUSE
WHERE BATTLE TOOK PLACE.

BATTLE IS BELIEVED TO HAVE
DESTROYED INTERNATIONAL
PLOT AGAINST ROYALTY SET
FOR JUNE.

LONDON, Jan. 4.—The charred and blackened body of "Peter the Painter," the recognized leader of the gang of anarchists, against whom the police and soldiers fought yesterday, was today dragged from the ruins of the Sidney street den of the band, which was burned after the battle.

The public is today urging the sternest crusade against all foreign anarchists. It was confirmed today that the band, headed by two Russian terrorists, had planned the greatest international plot against royalty in the history of modern civilization. A Russian woman, who was captured, is believed to have betrayed the secrets of the anarchists. The body of "Dutch Fritz," another leader of the gang, was recovered yesterday.

The press throughout England is today denouncing the laxity which has allowed London to become a hotbed of anarchy and also censures the loose laws against anarchy in the United States.

HOUSEBOAT HARMONY HALL AT PRINCE GEORGE DOCK.

The houseboat, Harmony Hall, owned by Capt. Wm. Huston, of Columbus, Ohio, came in from St. Augustine by way of the canal, Tuesday noon and docked up at the Prince George dock for a few days stay, here before continuing her cruise to Miami and other points down the coast.

On the Harmony Hall with Captain Huston is a pleasant party consisting of his daughter, Mrs. J. J. Thomas, and little son, Miss Lily Thomas and Miss Margaret Miller, all of Columbus.

The Harmony Hall is 62 feet in length by 15 foot beam. She is not fitted with power, but is towed by a launch of the same name.

The Harmony Hall is roomy and comfortable being supplied with all modern conveniences and furnished with a fine place in her main cabin. She has cruised in these waters in previous seasons and Capt. Huston and his family have friends in this city.

ROMANCE IS SEEN IN SUIT.

SUIT TO SETTLE OWNERSHIP
OF LAND TRACT NEAR DE LAND.

BOND LUMBER COMPANY AND
DE LAND NAVAL STORES COM-
PANY MADE DEFENDANTS IN
THE ACTION.

Behind a suit in ejectment filed in the United States Court in Jacksonville and involving the ownership of 3,000 acres of valuable land in Volusia county, near DeLand, is said to be an interesting story, which dates back to the days when the entire state of Florida was owned by Spain, and favorites of the crown received liberal grants as a token of kingly favor. It is even hinted that a romance figures in the history of the grant.

From a strictly legal standpoint, there is little interest in the case. William B. Braisted, Miltonella Beardsley, William B. Beardsley, of the state of New York, and William C. Braisted of Pennsylvania have entered a suit of ejectment, asking damages of \$10,000 against the Bond Lumber Company and the DeLand Naval Stores Company.

Recently in United States court appearances were filed by attorneys of the defendants, Landis & Fish, of DeLand, the George M. Robbins, qualified as attorneys for the Bond Lumber Company.

From what has been learned of the case, Jacob Braisted, an ancestor of several of the plaintiffs to the suit, secured the land in question several centuries ago. The land was then held by a Spaniard named Reyes and the property was known as the Reyes estate.

It appears that in the lapse of years since that time the land in some manner passed out of the hands of the heirs of the alleged rightful owner and is now in possession of the companies named as defendants in the suit for ejectment.

Many leading families of Florida have, at one time or other, held title to the property, among them being the Beard family. One of the Braisteds named as plaintiff in the suit is said to be a naval surgeon, now stationed at Washington.

It is probable that as the case progresses some light may be thrown on the manner in which Jacob Braisted secured the land from the Reyes estate and some romance of a far distant past uncovered.
